

CONGRATULATIONS ON THE PURCHASE OF YOUR PROPERTY

FREE ON SITE CONSULTATION

As part of our full service home building practice, we offer a **free on site consultation** to discuss the site development elements that will most likely be needed in order to build your new home. Things like:

- Power, Water & Sewer Disposal
- Property Access
- Soils Analyses
- Grading, Clearing & Site Preparation
- Zoning, Permits
- Environmental Considerations

These are just a few issues to be considered. We have helped many in the beginning stages of their home building project with direction and council, which has saved financial resources, frustration and time.
